THE NEW SUPERSLIM

COBOX

# TWO DRAWER HEIGHTS, SEVEN DRAWER LENGTHS

The new superslim COBOX drawers bridge the gap between the basic Metabox style drawer and twin walled drawers like our Magic Box series. The sides are rigid single skin steel panels 1.2mm thick, finished in a durable textured dark Grey/Mocca coating.

Assembly is quick and easy with adequate adjustment. Any thickness of board can be used for the back and base and the stylish and rugged nature of the assembled drawers make them equally suited for installation in high quality domestic bedrooms, bathrooms and kitchens or for office applications and contract situations such as student accommodation blocks and hotels.

Front panel side adjustment: Left 1.5mm/Right 1.5mm
